

## SH 249 Recommended Study Area (no specific routes identified)

- Recommended Study Area** – This option would originate at the potential interchange at SH 249 and FM 1774, but travel diagonally north-west to connect with SH 105 between FM 1748 and FM 362. It would then utilize the existing SH 105 to travel up to the interchange with SH 6. It would have interchanges with FM 1774, CR 304, and SH 105 (shown as green).

[For clarification: A Super 2 highway is a two-lane rural highway with full access control where a periodic passing lane is added to allow passing of slower vehicles. The Super 2 is designed for eventual conversion to a 4-lane divided highway.]
